Abstract (en)

[origin: GB2305544A] A high power switching arrangement includes a compartment which contains switchgear together with insulating gas and a venting chamber 9. A pressure relief vent 8 in a wall of the compartment causes gases produced during a catastrophic failure to be exhausted into the venting chamber which includes a plate 31 to give a turbulent flow to the gases and a plate 41 downstream of plate 31 to give a controlled directed flow towards an outlet port.
