Abstract (en)

[origin: DE19535822A1] The description relates to an arrangement for connecting at least one electric plug to at least one matching plug having an interchangeable connection component (4) designed in such a way that it can be inserted into a recess (3) in the casing of the plug perpendicularly to the assembly direction of the plug (1) and parallel to the side in which the recess (3) is located and can also be withdrawn again only in this direction. The connection component (4) has means (5) for securing to a matching plug and/or for coding.
