Abstract (en)

A pallet system is described, consisting of corrugated or waved board layers and a method for its execution, said pallets comprising a first cardboard layer (5) forming the pallet loading plane and a second cardboard layer (6) glued to said first cardboard layer, and at least three spacing feet (7) between the pallet loading plane and the floor to form a throughway for the insertion of lifting and handling mechanical means for such a pallet. According to the present invention, said feet are glued to said first cardboard layer, and said second cardboard layer has throughholes (8) for the insertion and fastening of the feet. <IMAGE>
