Abstract (en)

[origin: EP0853157A1] The apparatus to extract foreign matter from a textile fabric, and to dry it, has an air outlet as a jet slit (4) in the working head (1). A flow channel section (11), for a partial air volume, is at least almost at right angles to the flow direction of the jet slit (4), connected at the flow side to the air exhaust outlet at the working head (1). Also claimed is a gun to clean dirt spots on a fabric, with the working head, as an integrated manual appliance.
