Abstract (en)
[origin: EP0853269A1] A shield (1) is provided for protecting graphics related to a control mechanism (6). In order to achieve the objective of enhancing visibility, a dome or bubble shaped magnifying section (4) is provided within the shield (1). The magnifying section (4) is sized and positioned such that it magnifies only the setting that the user has selected. The shield (1) is secured by an attachment mechanism (5a,5b) to the controlled device. The control mechanism (6) is movable such that the setting selected by the user appears under the magnifying section (4) of the shield (1). <IMAGE>
