Abstract (en)
[origin: EP0855160A2] The bed comprises a base frame, seat (2) with backrest (3) that can be collapsed to form a bed, box (4) beneath the seat and a reclinable section where the seat is moved forwards beyond the front of the sofa. Pulling the seat forwards by a distance (W) converts the sofa into a bed. The front edge (2a) of the seat and rear edge (3a) of the backrest are aligned with both the vertical edges (5a) of the seat in the reclinable sofa section. Preferably the box is moved on rollers (6,7) along wood slide rails (8) with stoppers (9,10) at each end. The rear ends of the rails are sloped downwards. The rails are secured to the sides of the frame and to a wood bar (8a) along the front edge of the seat.
