Abstract (en)
[origin: EP0855338A2] The floating body modules (10a, 10b), connecting modules (12, 13) and basic modules (11, 16, 16b) can be produced in different sizes and in these sizes arbitrarily combinable with one another. The floating body modules in their central body section have a recess (10c) for locating and fixation of the connecting modules and basic modules. The tubular connecting modules are provided with holes for the fixture pins of the floating body modules, together with components of all drive and usage types, e.g. of the mast, rudder or engines of different kinds. The basic module (11, 16) is of loadable and waterproof material and is insertable in the space formed by the connecting module between the two floating body modules, thus creating a dry usage space.
