Abstract (en)

[origin: EP0855467A2] The fixture consists of a base (3) which is fixed to the supporting surface by a fastener (5) and has a spacer leg (9) with a hook-shaped end (10) to engage with the mesh or rod. The spacer leg (9) has a support (11) for the trellis section or rod engaged with the hook, with the edges (12,14) of the support and hook offset relative to one another for easy fitting of the fixing. The fixing can be made from metal or plastic, depending on requirements.
