Abstract (en)

[origin: EP0855551A1] The holder arrangement has a lamp holder (4) mounted on the rear of the reflector (3) and locked to the reflector with holder fittings. The lamp holder contains at least one section of the reflector aperture (2) with two outwardly sprung end sections (6) which contact inwardly facing edge sections (7) of the reflector opening under tension via protruding holder fittings (5). The holder fittings form a joint with the edge sections transversely wrt. the lamp axis (8).
