Abstract (en)
[origin: EP0855558A2] The stove has a housing with burner chamber. The chamber (2) has grate (3), rear wall (4), and side sections (5), and may be moved downwards and fastened within the stove housing (1). The burner chamber has an external ring-shaped seal (14). In closing position, the seal acts with a sealing face (15) located in the stove housing and the transparent front burner chamber section (11). The burner chamber moves slide-like in side guides (6), which are located on either side of the burner chamber. The chamber is connected to counterweights via cables, chains, etc passing over deflection pulleys.
