Abstract (en)  
[origin: WO9711970A1] The invention relates to cyto­statin II growth modulatory peptides, polynucleotides encoding the polypeptides, methods for producing the polypeptides, in particular by expressing the polynucleotides, and agonists and antagonists of the polypeptides. The invention further relates to methods for utilizing such polynucleotides, polypeptides, agonists and antagonists for applications which are related, in part, to research, diagnostic and clinical arts.
