Abstract (en)

[origin: WO9714799A1] Novel fibronectin binding protein B polypeptides and DNA (RNA) encoding such novel fibronectin binding protein B and a procedure for producing such polypeptides by recombinant techniques is disclosed. Also disclosed are methods for utilizing such novel fibronectin binding protein B for the treatment of infection, particularly bacterial infections. Antagonists against such novel fibronectin binding protein B and their use as a therapeutic to treat infections, particularly bacterial infections are also disclosed. Also disclosed are diagnostic assays for detecting diseases related to the presence of novel fibronectin binding protein B nucleic acid sequences and the polypeptides in a host. Also disclosed are diagnostic assays for detecting polynucleotides encoding novel fibronectin binding protein B family and for detecting the polypeptide in a host.
