Abstract (en)
[origin: DE19642729A1] New isolated polynucleotide encoding a protein that is identical or related to the naturally occurring *Bacillus popillae* crystal protein has a 2121 bp DNA sequence (I; given in the specification). Also claimed are: (1) a recombinant DNA vector containing (I); (2) a transformed host cell containing (I); (3) genetically transformed host cells containing the (I) stably integrated into their genome; and (4) the isolated protein encoded by (I).
