Abstract (en)
[origin: DE19705092C1] The roller has a frame, locked to the machine, with two adjustable bearing pedestals for pressure rollers. The frame is formed from a guide pillar (1). The pedestals (20) are located on upper and lower press roller holders (2, 3), which are guided on the pillar and are adjustable opposite to each other. The pillar and roller holders are cylindrical, and the holders are carried inside the pillar. The upper roller has an upper adjusting drive (4) engaging on the pillar and the lower holder has a lower adjusting drive (5), located in the upper holder and engaging on it.
