Abstract (en)

[origin: EP0856412A2] A platen-gap regulating apparatus for regulating a carriage with respect to a platen of a printer, comprises: a pair of guide members rotatably mounted on the printer via an eccentric portion, for running the carriage; and regulating means for imparting the same rotational displacement quantity to both the guide members, wherein the carriage is separated from and drawn near to a printing reference plane in parallel thereto. <IMAGE>
