Abstract (en)

A method of conversion of a single hull vessel to a double hull vessel. The method including the steps of: a) positioning a section of a second hull (4) shell beneath a first hull (2) of a vessel; b) raising the section of second hull shell to locate it adjacent the first hull; c) attaching the section of second hull shell to the first hull. The method also including locating the second hull shell in relation to the first hull by means of locating means in the form of male and female locating members. <IMAGE>
