Abstract (en)

[origin: EP0856631A2] The sliding door(6) is lowered by a guide at an angle to the horizontal from an open to a closed position. The guide arrangement (9,10) comprises parallel first and second guide elements (15,16), and a control (17) for the sliding door comprising elements (7,8) at an angle to each other. The sealing unit has a first and second seal positioned at a top or bottom end part of the sliding door. A third (22) and fourth (23) seal are positioned on upright borders (24-27) of the sliding door. The guide elements have guide sleeves (28-30) mounted on sliding shafts (31,32) the ends (33,34) of which are held in position by fixtures (35-38).
