Abstract (en)

The anchor comprises a U- or V-shaped base part (16v) with arms (24) adjoining the free arm ends of the base part. The arms run at an angle of more than 0 but less than 90 degs. relative to an axial extension of the base part arms and at an angle of more than 0 and less than 90 degs. relative to a plane spanned by the base part arms. The base part and the arms (24) can be integral. The anchor has a stretched S-shape. The anchor can be covered with a material which melts or burns off through heat action.

Abstract (de)

Die Erfindung betrifft einen Armierungsanker, insbesondere für feuerfeste Auskleidungen an Metallwänden, mit einem U- oder V-förmigen Basisteil (16v) sowie Armen (24), die an die freien Schenkelenden des Basisteils anschließen. <IMAGE>
