Abstract (en)
[origin: EP0856717A2] An integrated heat exchanger which includes a radiator (13) adjoining a condenser (11) and shares corrugated fins (25) disposed in a core (17) formed between the radiator (13) and the condenser (11), the heat exchanger including a partition (27) for dividing the inside of a tank (19,20) of the radiator (13) into which cooling water flows; and opening/closing means (31) which is disposed in the partition (27) so as to open when the temperature of the cooling water reaches a given temperature or more, as well as to close when the temperature of the cooling water is less than the given temperature.
