Abstract (en)
A games table comprising a playing surface supported by a beam structure (2) which is mounted on a support structure (1). The beam structure (2) is comprised of at least two transverse beams (11) and at least one longitudinal beam (12). The or each longitudinal beam (12) is attached at each end to a transverse beam (11). The beam structure (2) has at least four points at which it is mounted on the support structure (1). Each mounting allows the height of the beam structure (2) to be adjusted relative to the support structure (1). <IMAGE>
