Abstract (en)

[origin: EP0857847A2] At least one of the two end pieces (4) attached to each mullion (3) is pushed forwards by more than 2mm and pref. more than 4 mm along the mullion up to the spacer (2) and fixed in this position. At least one end piece can project into the spacer. The centring elements (7) which centre the mullion frame between the two glass panels can be fixed on the glass panels by suction heads. At least one of the two end pieces on each mullion can be attached displaceable on same and fitted with fixing unit to fix the end piece in the advanced position
