Abstract (en)
[origin: EP0858088A2] The electric switch has at least one contact point (10). This has a T-shaped contact rocker (12) suspended in a bearing. The rocker (12) has at least one movable contact member (22) and at least one fixed contact member. The switch also has a manual actuation element which acts on the rocker via a compression spring (18). The switch also has a transfer element (14) between the manual actuation element and the rocker (12). The transfer part has a groove (38) open towards the rocker. The rocker engages in the groove. The spring (18) is guided on the transfer part.
