Abstract (en)
[origin: WO9716077A1] The invention relates to a probiotically acting formulation which contains micro-organisms stabilised by lyophilisation, and a food carrier which allows the lyophilised micro-organisms to pass through the gastric juice in a higher germination index. The lyophilised micro-organisms in the carrier are melted. The invention also relates to the use of said formulation as a food additive and food, in particular muesli, containing this formulation.
