Abstract (en)
[origin: GB2306801A] A cordless electrical appliance such as an electrical kettle has an element protection control (1) combined with an appliance connector inlet part (4) of the cordless connection system of the appliance, the element protection control (1) and the appliance connector inlet part (4) being separate items which plug into each other by way of connections (12, 13) which may provide a degree of flexibility as regards the relative positions of the parts when they are plugged into each other. Manufacturing tolerances can thereby be readily be accommodated.
