Abstract (en)  
[origin: WO9716944A1] The invention relates to a superimposed-pulsed ignition device which has a transformer (1) and at least one of the following components: a terminal (9), a capacitor (17) and a power resistor (18). The transformer (1) is arranged on a carrier device (2) which is a torsionally rigid structure. Supports (14, 16) for fastening one or a plurality of the above components are provided on at least one side of the component (2).
