Abstract (en)  
[origin: EP0858765A1] The rectangular wiper cloth is used in floor cleaning equipment with a clamping frame having two folding sections. At each end of the surface there is a pocket (3) accepting a clamping section. An additional holder (5) is also located on the upper side, for the same purpose. This is formed preferably by flexible clamps on the upper side of the pocket, into which the bow of the clamping frame clips. Preferred materials of construction include polyvinyl chloride, polyamide, polypropylene and/or polyethylene.
