Abstract (en)  
The transport frame is made from two rectangular tube cross sections linked by cross sections and with end angle sections. Up to 20 layers of complete fence sections can be stacked on each frame, in the upright position. The frames are carried on trucks, either accessible from either side or in a transverse orientation. Only two operators are required to load and unload the frames, with the frames dropped along the fence line or taken along the fence line on a truck. The frames can be fitted to transport trucks or carried on fork lift trucks.

Abstract (de)  
Durch die Verwendung von Fertigzauntransportrahmen ist eine erhebliche Arbeitseinsparung möglich, vor allen Dingen beim Auf- und Abladen bei Fertigzäunen. Sowie bei dem Zwischenlagern, oder auf dem Lagerplatz fällt keine Handarbeit mehr an. Die Lagerkapazität ist doppelt so hoch, da übereinandergestapelt werden kann. <IMAGE>
