Abstract (en)
[origin: EP0859351A2] A cost effective mirror with a motif, or with advertising logo, has the motif on a transparent foil (6) and applied to the mirror (4) by a self adhesive film (8) on the back of the foil. The foil is covered by a transparent glass plate (12) and the assembly is sealed at the edges by adhesive tape and/or by fitting into a frame. Several foils can be assembled into a picture/motif either in the same plane or by successive layers, spaced by transparent glass plates, to generate special effects. The transparent cover layer can also be applied as a water soluble solution to fill the spaces around the motif. This layer is applied/smoothed by rollers.
