Abstract (en)

[origin: WO9717242A1] The conveyor system proposed has self-propelled carriages (22) which travel on rails (12). To simplify and improve the conveyor system, the carriages (22) are fitted with a rigidly mounted container (24) having a cavity in which boxes (26) intended for the conveyance of goods can be placed and held. The boxes (26) are loaded into the container and unloaded again at loading and unloading stations (10).
