Abstract (en)  
[origin: EP0860137A2] The hopper is for hygienic and other paper strip to be parted off into sections, having a storage section (17) of width corresponding to that of the strip, a bottom accommodating the latter, and a front wall with tear-off equipment. An opening (47) or cut-away portion is formed in the front wall, its width being appreciably narrower than that of the storage-section. A tear-off edge (21), over which the strip is pulled, can also be provided on the wall. A recess (73) can be provided behind the tear-off edge, allowing the strip edge to be gripped by the user. The tear-off edge can be narrower than the strip passing over it. A vessel for liquid can be provided together with a dispenser for moistening the strip.
