Abstract (en)  
[origin: EP0860245A2] The pressing tool has two or more pressing jaws (10,11) coupled together so that when one is operated the other or others is/are moved in the same direction. The jaws are connected together by a coupling rod. The or at least two adjoining movable jaws have opposite recesses in which a coupling element can be fitted so that when one jaw moves the other is moved in the same direction. The coupled jaws are spring- biased in the closing direction.
