Abstract (en)
A steering lock and ignition assembly has a two position knob for operating an ignition switch of a vehicle and for operating a steering lock mechanism of the vehicle. The knob is retained within a housing by a latch device until authorization by an authorization system is provided to the latch device. When authorization is received, the latch device releases the knob from the housing so that the steering lock mechanism can unlock the steering shaft and the ignition switch can be operated to start the vehicle. <IMAGE>
