Abstract (en)

[origin: EP0860559A1] Sanitary equipment may be pre-fitted to an installation wall of profiled bars to facilitate installation on site. An assembly wall (1) may be used as an aid to prefabrication of the installation wall, the assembly wall and the installation wall be constructed of the same profiled bars (2-8). For at least part of the walls, the connectors (9,11,13,14) and spacings between sections are the same, those in the assembly wall being the pattern for corresponding spacings in the installation wall. Markings may be provided on some horizontal sections (3,4) for the positioning of vertical sections of the installation wall.
