Abstract (en)
[origin: US6004162A] For a holding frame for holding plug connector modules and for installation in plug connector casings or for screwing onto wall surfaces, the plug connector modules being inserted in the holding frame and holding means on the plug connector modules interacting with recesses provided on opposite wall parts (side parts) of the holding frame, it is proposed that the holding frame be constructed from two halves connected to one another in an articulated manner and that the recesses for holding the plug connector modules be constructed, in the side parts of the holding frame, as openings which are closed all round. Under these circumstances, the holding frame is unfolded for the purpose of inserting the plug connector modules and is then closed, the plug connector modules then being held in a form-locking manner in the holding frame via the holding means.

Abstract (de)
Für einen Halterahmen zur Halterung von Steckverbindermodulen und zum Einbau in Steckverbindergehäuse bzw. zum Anschrauben an Wandflächen, wobei die Steckverbindermodule in den Halterahmen eingesetzt sind und Halterungsmittel an den Steckverbindermodulen mit an gegenüberliegenden Wandteilen (Seitenteilen) des Halterahmens vorgesehenen Ausnehmungen zusammenwirken, wird vorgeschlagen, den Halterahmen aus zwei gelenkig miteinander verbundenen Hälften auszubilden und in den Seitenteilen des Halterahmens die Ausnehmungen zur Halterung der Steckverbindermodule als allseitig geschlossene Öffnungen auszubilden. Dabei wird der Halterahmen zum Einsetzen der Steckverbindermodule aufgeklappt und anschließend geschlossen, wobei dann die Steckverbindermodule über die Halterungsmittel formschlüssig in dem Halterahmen gehalten sind. <IMAGE>
