Abstract (en)
[origin: DE19542277A1] The proposed steerable sled has a first and a second body section (10 and 20 respectively), a right-hand and a left-hand steering ski (30 and 40 respectively), a steering unit (50-59) and a brake unit (60-63). Co-ordinated first connecting elements (11, 12, 21, 22) are provided on the first and second body sections to create a rigid connection between the two sections. The second body section (20) is provided with one or more bearing surfaces (23, 24) and two rear sliding surfaces (25, 26). Second co-ordinated connecting elements (13, 14, 31, 41) are provided on the first and/or second body section and on both steering skis to connect the two steering skis to the first body section.
