Abstract (en)

[origin: WO9718375A1] The description relates to a multi-chambered frame section (1) for windows or doors with at least one vertical web (5) - looked at in cross-section - to form an inner chamber (2) and an outer chamber. The inner chamber (2) is essentially undivided to accept an electro-mechanically driven ventilation unit. The inner chamber (2) also has an air intake or outlet aperture. The vertical web (5) and the outer chamber have apertures to provide a continuous ventilation duct.
