Abstract (en)

Flex-rewinding device for domestic vacuum cleaners and the like in which the relevant spool is formed by two axially coupled flanged hubs (4, 5, 6, 7) that are produced by moulding a plastic material in a mould and counter mould, without a sliding platen, the coupling and clamping of the hubs ensuring that the electric flex is secured to the hubs by inserting the electric flex, which is housed in a recess (10, 11) formed in the coupled faces of the hubs, between the hubs or, alternatively, by securing a terminal block (44) in the hubs which can be removed by loosening the hub-clamping means and is provided with securing means (52) and with electrical contacts (48, 49) which can move with the hubs and are in electrical contact with fixed contacts (20, 21). <IMAGE>
