Abstract (en)
[origin: EP0861967A2] The mobile ram or drilling rig has a sub module provided by the ram or drilling tool and a sub module provided by the mobile chassis (10) and the steering mechanism (16) coupled together via a coupling device (18). The latter has a respective coupling parts (28,30) associated with the 2 sub modules and coupled together via a plug-fit coupling (40,44). The steering mechanism may have a parallelogram linkage (20,22) to which the coupling part for the second sub module is attached.
