Abstract (en)
[origin: US6071127A] An HF coaxial plug connector includes coaxial plugs disposed in a multiple plug housing-coaxial plug module, and coaxial sockets disposed in a multiple socket housing-coaxial socket module for use in circuits, especially in printed circuit board technology. Coaxial outer conductors of the coaxial socket module are at least partly integrated with its housing in the form of sheaths which act as coaxial outer conductors and extend in the housing toward its insertion side for the coaxial plug module. Insulating plastic sheaths which are inserted into these thus-created coaxial outer conductors, receive coaxial inner conductors therein.
