Abstract (en)
[origin: DE19646879A1] In reactive one-component polyurethane adhesive based on polyisocyanate(s) (I), oligomer(s) (II) reacting with isocyanate (NCO) gps. and catalyst(s), the catalyst comprises tert. amine(s) (III) with functional gp(s). for incorporation in the polymer chain. Also claimed is a method of preparing the adhesive under such conditions that the end prod. is low in monomer.
