Abstract (en)
[origin: DE19708934C1] Of the two profile strips, one is at least partly fixable by adhesion to a vertical bath tub or shower basin edge and the other to a horizontal edge. The second of the two profile strips after application of tiles around the tub or basin is removable, creating a defined groove. At least the removable profile strip (12) to be removed has at least one perforation running in a longitudinal direction for separation of at least one strip-shaped wall connection profile (WP) for sanitary objects. The profile strip arranged on the tub or basin edge is at least partly coated with adhesive, which is covered by a releasable sheet.
