Abstract (en)
[origin: EP0862885A2] Flexible shower curtain (4) of a shower (1) with tray (2) is suspended from rods (3) which have a height adjustment device (9), the curtain being capable of folding horizontally. Preferably the height is adjusted by telescopic rods (10) connecting the shower tray to the curtain rod arrangement, which forms an enclosed peripheral rod to which the telescopic rods are fastened. The telescopic rods are preferably provided with stops (11). The curtain is preferably in the form of lamellae (12) which have a zig-zag like connection.
