Abstract (en)

[origin: EP0863088A1] The emptying device can empty out paste filling a hose bag (10). It includes a receiver part (12) with a support surface for one end of the hose bag, formed by a transverse wall (13). There is a recess (15) in the transverse wall (13) which ends in an outlet grommet (16). A mandrel (17) opens the hose bag foil. The recess has an annular groove (18) round it in the transverse wall. The groove is filled with adhesive and serves to receive an annular projection (20) pre-moulded on the end of the hose bag.
