Abstract (en)

[origin: EP0863254A2] To produce a multi-layer paper, with two stock inlets (12,23) and two formers (14,24), the paper layer structure is developed at least at one of the two formers (14,24) between a blanket (2) and fourdrinier (20) passing round a former roller (16,26). Also claimed is a papermaking machine where at least one of the two formers (14,24) is a crescent former, with a blanket (22) and a fourdrinier (20) passing round the former roller (16).
