Abstract (en)

[origin: EP0863270A1] The building is constructed from a kit of parts, one storey in height, having different base areas, including a small right-angled member (10), the external length of each arm being a basic grid dimension. It also has a large right-angled member (12), whose arms are double the basic grid dimension, an L-shaped member (14) with external arm lengths of basic grid dimension and double basic grid dimension and a mirror-image L-shaped member (16) with arms corresponding to the other L-shaped member. It also has and a T-shaped member (18) with flange and leg and flange thickness equal to double the basic grid dimension. Thickness of the arms, flange and leg is preferably 1/5 of the basic grid dimension, which is 125 cm.
