Abstract (en)  
[origin: EP0863523A2] The electrical switch has a handle which rotates moving contacts (21) into contact with fixed contacts. A sliding section is accessed by a hub (13). The rotating part has two main sections, a lower section (18) with springs (22) and an upper command protrusion (13). The lower section is made in two sections (19,20). The upper section is a command section which moves between a stop and sliding position. The sliding movement is activated by springs (24).
