Abstract (en)
[origin: CA2228900A1] This invention relates to a mural socket of the "Modular-Jack" type, provided to receive cables arriving from very varied directions. It is associated with a termination pusher which is totally symmetrical with respect to its transverse plane. Jaws fixed on the socket cooperate with shapes on the rear of the pusher in order to grip it and introduce it by force, with lever effect, in its receiving part, itself provided with I.D.C.'s.

Abstract (fr)
Elle s'associe à un poussoir de connexion (10) qui est totalement symétrique par rapport à son plan transversal. Des mâchoires (17, 18), fixées sur la prise, coopèrent avec des formes (19, 20) de l'arrière du poussoir pour le saisir et l'introduire à force, avec effet de levier, dans sa pièce réceptrice (15), elle-même garnie de contacts IDC (7). <IMAGE>
