Abstract (en)
The plug (12) incorporates at least one electrical resistance (16) within the plug housing, for connection to the ignition lead supplying the burner ignition electrode, for acting as a current limiting resistance. The plug may have a pair of socket sleeves (14), each coupled to a respective wound wire resistance within the plug housing, which is embedded in an insulating plastics.

Abstract (de)
Es wird ein Stecker für ein Zündkabel vorgeschlagen, wobei das Zündkabel (10) über zumindest einen Widerstand (16) eine Zündelektrode eines Brenners mit elektrischer Energie versorgt. Der Widerstand (16) ist innerhalb eines Gehäuses eines Steckers (12) angeordnet. <IMAGE>
