Abstract (en)
[origin: DE19640480A1] Disclosed is a high pressure fuel accumulator for a direct fuel injection system in an internal combustion engine, supplied with high pressure fuel by a high pressure pump and comprising connections designed as connecting branches from which each connecting bore opens into a tubular body off centre to the latter's axis. Tubular body is produced by forging and comprises forged connecting branches(2,6,7) and fastening elements (3).
