Abstract (en)
[origin: WO9720323A1] An apparatus including an abrasive liquid jet cutting module with a movable omnidirectionally adjustable nozzle (25) supporting a sensor (37) for determining in advance the position or shape of the structure to be cut, a dosemeter (49) for measuring the radiation level, and a decontamination device (51) for removing excess contamination. Cutting residues may be collected by suction. Said apparatus is more universal than currently known apparatuses.
